OBJECTIVE

Seeking an on-campus job

EDUCATION

Iowa State University, College of Engineering Ames, Iowa
Bachelor of Science in Computer Engineering

Expected December 2027

EMPLOYMENT

Iowa State University Foundation, Iowa

Feb 2021 – Jan 2022

- Promoted from student fundraiser in recognition of strong performance and leadership potential.
- Trained new student fundraisers on sales techniques and donor engagement strategies.
- Led teams during shifts, providing real-time guidance to maintain productivity and morale.
- Served as a liaison between student employees and management.

Iowa State University Foundation, Iowa

Feb 2020 – Jan 2021

Student Fundraiser

- Engaged alumni and donors through outbound calls to communicate the impact of giving and driving financial support for Iowa State programs and students.
- Applied selling techniques to identify donor interests, overcome objections, and close contributions.
- Consistently met or exceeded fundraising targets.
- Built rapport quickly with a diverse range of prospects, strengthening long-term donor relationships and brand trust.
- Maintained accurate donor records and interaction notes in Salesforce to support future campaigns.

PROJECTS

Automated Forex Trading Agent

Self-directed project

Feb 2026 – March 2026

- Built python-scripts that pulls real-time and historical price charts from Vantage APIs for free.
- Created a product requirements document (PRD) that breaks the trading bot into a step-by-step execution flow -> signal intake -> validation -> risk/position sizing -> order placement -> trade management (SL/TP) -> exit -> logging/analytics.
- Used NotebookLM to extract key trading concepts and rules from Youtube educational videos, then organized the insights into structured notes to help train and refine a trading model.

Automated Sports Arbitrage System

Self-directed project

Feb 2026 - March 2026

- Built Python scripts to collect and normalize real-time sports odds data from multiple APIs for cross-platform comparison.
- Developed an arbitrage engine that identified pricing discrepancies, calculated profit margins, and filtered low-value opportunities.
- Structured the workflow into data intake, validation, opportunity detection, and logging to support fast analysis and iteration.

Cybersecurity A.I. Agent

Self-directed project

March 2026 - present

- Built an AI-assisted cybersecurity agent to support recon, tool orchestration, and structured vulnerability triage in bug bounty workflows.
- Integrated shell-based automation and web tooling to speed up repeatable security tasks such as surface mapping, data collection, and validation.
- Designed a prompt-driven reasoning framework that filtered weak findings, reduced repeated paths, and enforced step-by-step hypothesis testing.

ENTREPRENEURIAL VENTURES

Founder - OutsourceAE

Oct 2023 – June 2024

- Founded and operated a UAE-based outsourcing startup connecting clients with skilled remote workers in Pakistan and India to improve productivity and reduce operational costs.
- Designed onboarding and training workflows to ensure consistent quality, communication standards and delivery timelines.
- Primary account manager, maintaining relationships, upselling services, and securing repeat business.

Founder - EvolvAISolutions

Jan 2025 – June 2025

- Co-founded a UK based AI automation startup focused on building workflow solutions using n8n for workflow/business process automation/optimization.
- Consulted with clients to identify inefficiencies and design AI-driven automated workflows tailored to their operations.
